Antelope Valley Adjudication Area
Proposed Adjudication Boundary

The base map was created using GIS shapefiles available through agencies of the state of California.
Transportation layers were obtained from [www.gis.ca.gov/data.ep]. These files are typically in a Trans-Albers Projection.
The original DMA groundwater basin file was obtained from [www.waterboards.ca.gov/bulletin198basins, irrigations.ch] in a UTM 19, NAD 83 Projection.
The shapefile has been reprojected to a UTM 19, NAD 83 Projection.
This map was compiled and created by EDE Consultants, Bruce N. Nelson, P.E. representing Rio Tinto Minerals, Boron Operations.
