Appendix C: Community Outreach Materials
PROOF OF PUBLICATION

STATE OF CALIFORNIA

COUNTY OF LOS ANGELES

I am a citizen of the United States and a resident of the County aforesaid; I am over the age of eighteen years, and not a party to or interested in the above entitled matter. I am the assistant principal clerk of the printer of the Acton Agua Dulce News, (Acton Agua Dulce Weekly News) a newspaper of general circulation, printed and published weekly in the Community of Acton, county of Los Angeles, and which newspaper has been adjudicated a newspaper of general circulation by the Superior Court of the County of Los Angeles, State of California, under date of February 8, 1989, Case Number 9391; that the notice, of which the annexed is a printed copy has been published in each regular and entire issue of said newspaper and not in any supplement thereof on the following dates, to wit:

7/15, 7/22

in the year 2013

I certify (or declare) under penalty of perjury that the foregoing is true and correct.

M. Gayle Joyce
Antelope Valley Integrated Regional Water Management Plan

The Antelope Valley Integrated Regional Water Management Plan (IRWMP), A.K.A. The AV Water Plan, is a multi-county collaboration effort developed to address regional concerns about water supply reliability, water quality, flood protection, environmental resources and land use management in the Antelope Valley.

ANNOUNCEMENT:

The Antelope Valley Water Plan is now COMPLETE and has been posted for review. You can read the document by clicking on the icon to the left.

Antelope Valley Integrated Regional Water Management

What is integrated regional water management?

Integrated Regional Water Management (IRWM) is a collaborative effort to manage all aspects of water resources in a region. IRWM crosses jurisdictional, watershed, and political boundaries; involves multiple agencies, stakeholders, individuals, and groups; and attempts to address the issues and differing perspectives of all the entities involved using mutually beneficial solutions.

This State program encourages local agencies to work cooperatively to manage local and imported water supplies to improve quality, quantity, and reliability.

The IRWM Program organizes the State into Regions based on shared challenges & responsibilities

The Antelope Valley is one of 48 regions in the State of California. Regions are defined as contiguous geographic areas encompassing the service areas of multiple local agencies, and are defined to maximize the opportunities to integrate water management activities. Each region is self-defined, and is approved by the California Department of Water Resources. Approved Regions are eligible to apply for grant funding.

The Antelope Valley Region encompasses approximately 2,400 sq miles in northern Los Angeles County, southern Kern County, and western San Bernardino County.
Numerous Antelope Valley stakeholders have been engaged in the Program since 2006

Leaders and agencies in the Antelope Valley joined together to form a Regional Water Management Group (RWMG):

Other stakeholders also participate in the Antelope Valley IRWM process:

- Antelope Valley Board of Trade
- Antelope Valley Conservancy
- Antelope Valley Resource Conserv. District
- Antelope Valley United Water Purveyors
- Building Industry Association
- California Dept. of Fish & Game
- California Dept. of Public Health
- California Dept. of Water Resources
- CA State Water Resources Control Board
- California State Parks
- City of Boron
- City of California City
- Edwards Air Force Base
- Kern County Board of Supervisors, Dist. 2
- Kern County Farm Bureau
- Kern County Planning Department
- Lahontan Reg. Water Qual. Control Board
- Lake Los Angeles Town Council
- Leona Valley Town Council
- LA County Board of Supervisors
- LA County Dept. of Public Works
- LA County Dept. of Regional Planning
- LA County Farm Bureau
- Mojave Desert Mountain Resource Conservation and Development Council
- National Education Association
- National Resources Conservation Service
- Roosevelt Town Council
- Sierra Club
- Sundale Mutual
- U.S. Department of Agriculture
- Westside Park
- White Fence Farms

Stakeholders have collaborated to develop water management objectives, to develop projects, and to write an IRWM Plan that is periodically updated

The Region’s objectives help to manage current and future resources.

- Provide reliable water supply and adapt to climate change
- Establish a supply contingency plan
- Stabilize groundwater levels
- Meet regulatory requirements and customer expectations
- Protect and maintain aquifers
- Protect streams and recharge areas
- Maximize beneficial use of recycled water
- Reduce negative impacts of stormwater, urban runoff, and nuisance water
- Preserve open space and natural habitats, and enhance water resources and species in the Region
- Maintain agricultural land use
- Meet growing demand for recreational space
- Improve integrated land use planning
- Mitigate against climate change

August 2013
Antelope Valley Integrated Regional Water Management (IRWM)

The IRWM Program was developed to encourage collaboration on water issues

Integrated Regional Water Management (IRWM) is a collaborative effort to manage all aspects of water resources in a region. IRWM crosses jurisdictional, watershed, and political boundaries; involves multiple agencies, stakeholders, individuals, and groups; and attempts to address the issues and differing perspectives of all the entities involved using mutually beneficial solutions.

This State program encourages local agencies to work cooperatively to manage local and imported water supplies to improve quality, quantity, and reliability.

The State is organized into IRWM Regions based on shared challenges & responsibilities

The Antelope Valley Region is one of 48 regions in the State of California. Regions are defined as contiguous geographic areas encompassing the service areas of multiple local agencies, and are defined to maximize the opportunities to integrate water management activities. Each region is self-defined, and is then approved by the California Department of Water Resources. Approved Regions are eligible to apply for grant funding.

Numerous Antelope Valley stakeholders have been engaged in the Program since 2006

Regional Water Management Group

- Antelope Valley Board of Trade
- Antelope Valley Conservancy
- Antelope Valley Resource Conservation District
- Antelope Valley United Water Purveyors
- Building Industry Association
- Antelope Valley Chapter
- California Dept. of Fish & Game
- California Dept. of Public Health
- California Dept. of Water Resources
- California State Water Resources Control Board
- California State Parks
- City of Bakersfield
- City of California City
- Edwards Air Force Base

Other Stakeholders

- Kern County Board of Supervisors, District 2
- Kern County Farm Bureau
- Kern County Planning Agency
- Lahontan Regional Water Quality Control Board
- LA Water District
- Lake Los Angeles Town Council
- Lake Los Angeles Park Association
- Leona Valley Town Council
- Los Angeles Co. Board of Supervisors, District 5
- Los Angeles Co. Dept. of Public Works, Watershed Management Division
- Los Angeles Co. Dept. of Regional Planning
- Los Angeles Co. Farm Bureau
- Mojave Desert Mountain Resource Conservation and Development Council
- Mutual Water Companies
- National Education Association, Antelope Valley
- National Resources Conservation Service
- Rosamond Town Council
- Sierra Club
- Sbudale Mutual Water
- Town Councils
- Tyndall Corporation at Edwards Air Force Base
- U.S. Department of Agriculture
- Weside Park Mutual Water Company
- White Fence Farms Mutual Water Company

The Region has a complex water balance

Stakeholders have collaborated to develop water management objectives and to write an IRWM Plan that is periodically updated

- Provide reliable water supply and adapt to climate change
- Establish a supply contingency plan
- Stabilize groundwater levels
- Meet regulatory requirements and customer expectations
- Protect and maintain aquifers
- Protect streams and recharge areas
- Maximize beneficial use of recycled water
- Reduce negative impacts of stormwater, urban runoff, and nuisance water
- Optimize the balance between existing beneficial uses of stormwater and capturing stormwater for new uses
- Preserve open space and natural habitats, and enhance water resources and species in the Region
- Maintain agricultural land use
- Meet growing demand for recreational space
- Improve integrated land use planning to support water management
- Mitigate against climate change

FOR MORE INFORMATION PLEASE VISIT: www.AVwaterplan.org
The Antelope Valley IRWM Region is made up of many unique cities and communities.

The Antelope Valley communities are working together through IRWM to implement water projects for the benefit of all.

Water banking projects help the Region to store water in the groundwater basin during wet years for later use during dry years.

Groundwater treatment projects allow the Region to remove arsenic and other contaminants from local water supplies.

Recycled water projects provide the Region with a local supply.

Groundwater recharge projects allow the Region to store both imported and local supplies, and to increase groundwater levels.
