Progress Association Petitions for Meeting

Directors of the Antelope Valley Progress Association voted Tuesday to conduct a study of the progress of flood control district project for the Antelope Valley. Vice President Charles Calley was chairman of the study group.

We shall study all phases of the project, including the engineering, design, construction, and operation, and recommend solutions to the problems encountered in the project. The recommendations of the study group will be submitted to the Board of Directors for consideration. The Board of Directors will then make a decision regarding the future of the project.

Other board members noted that there had been no public hearing on the project and that the public was not aware of the progress being made. The board members also noted that the project was important to the community and that it was necessary to proceed with the project in order to protect the community from the floods that occur in the area.

San Jose is located in the San Jose Valley, which is subject to periodic flooding. The project will help to reduce the frequency and severity of these floods.

Feather River Project Routes Raise Valley Hopes for Water

The challenge of raising money for the Antelope Valley water project is receiving widespread attention. The project is expected to cost approximately $100,000.

As explained by the staff of the Department of Water Resources, the project is expected to cost approximately $100,000. The money raised will be used to construct a water supply system that will provide water for the Antelope Valley.

The project is expected to cost approximately $100,000. The money raised will be used to construct a water supply system that will provide water for the Antelope Valley.
