ANNUAL REPORT OF GROUNDWATER EXTRACTION

The California Water Code authorizes the State Water Resources Control Board (State Water Board) to require annual reports of water diversion and use, including groundwater extractions. Our records indicate a report for Groundwater ID Number G193437 is due prior to July 1, 2011 for reporting year 2010. The report is associated with the well designation of #98. Information about the source, parcel number, county and other summary information is pre-populated on the associated online form if the information is available.

Beginning with the 2010 reporting year, all reports must be submitted through the online Report Management System. You can access the Report Management System at: http://www.waterboards.ca.gov/RMS. Instructions and frequently asked questions are also available on the website. Your user name and password are provided at the top of this letter. The user name will remain the same each year, however, the password will be changed. If you changed your password please use the one provided on this form. If you forget or misplace your password, please e-mail us at ewrims@waterboards.ca.gov to have your password reset. Agents or extractors with multiple sites will have the same password for all locations.

Please review and update the ownership information, if applicable. The State Water Board needs the complete name, mailing address, phone and e-mail address information of the current owner and/or agent. State regulations require the owner to notify the State Water Board directly of any ownership changes. Your county assessor or title company does not notify us of any ownership changes.

If you have questions technical questions or questions about online filing, please contact us at (916) 341-5431.

Sincerely,

Well #98 is in Los Angeles, and is recorded by the State Water Resources Control Board (SWRCB). Recordation No.G193437.
Well #106 is in Kern County, but the State Water Resources Control Board (letter dated April 22, 2003) declined recordation because it is outside Jurisdiction. In 2009, SWRCB initially accepted recordation for 2008 (letter dated June 11, 2009) but subsequently declined. TRC again filed in 2010, and the Board continued to decline recordation.

The dependence on groundwater in the Counties of Riverside, San Bernardino, Los Angeles, and Ventura has resulted in diminishing water supplies. As water becomes more scarce, determination of your water rights by the courts may become necessary. Your Annual Notice of Groundwater Extraction and Diversion is required to establish a record of water use which can assist the court in determining your rights.

The California Water Code requires you to record your annual surface and groundwater use if your total groundwater extractions from all wells exceed 25 acre-feet. Extractions of less than 10 acre-feet from a single well need not be reported. Although there is no penalty for failure to file the annual notice, failure to file is considered nonuse of water. Therefore, persons who do not file notices may have difficulty in supporting a claim of water use during a lawsuit to establish ownership of groundwater rights.

Exceptions: (1) If you are currently reporting your pumpage to a watermaster, your water use is already on record, and you are exempt from the requirement of filing a notice, or (2) if annual water use is less than the required amounts, filing is optional because these minimal amounts would probably not be affected by a water right dispute. All optional notices that are accompanied by appropriate fees will be recorded.

Should you require additional information about the Water Code requirements or assistance in completing this form, please write to the address on the top of this form, or telephone (916) 341-5300.

**TABLE I: AGRICULTURAL WATER USE WORKSHEET (Optional)**

To estimate your use of water, indicate below the crop type and number of acres. Then find the average irrigation requirement for each crop using Table II. Multiply acres (column 1) to applied water depth (column 2) to determine the amount pumped (column 3). Then total all amounts in column 3 to determine total irrigation use.

<table>
